# Introducing Scopus

# Using Published Literature

On average, researchers spend just over four hours searching for research articles a week and more than 5 hours reading them. They read 5 – 6 articles per week and only half are considered useful

2019  
Average (mean)

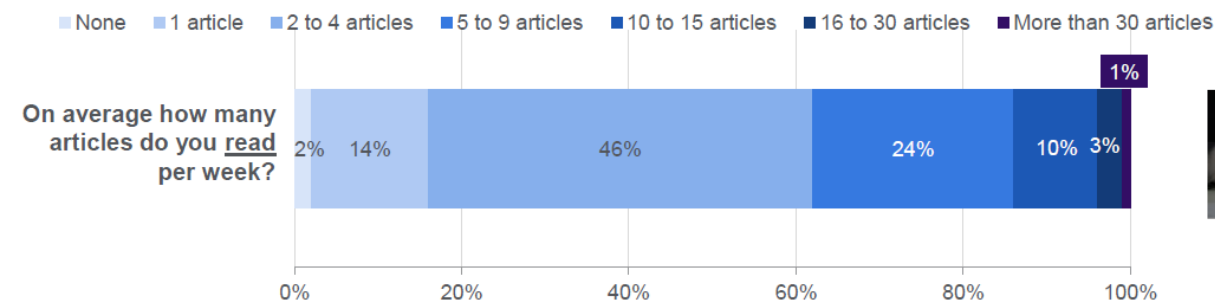

SEARCHING  
4 hours and 8 minutes

READING  
5 hours and 18 minutes

2011  
Average (mean)

SEARCHING  
3 hours and 42 minutes

Reading  
5 hours and 36 minutes

READING 5.4 articles per week

READING 6 articles per week

Approximately what percentage of the research articles you read per week do you find useful?

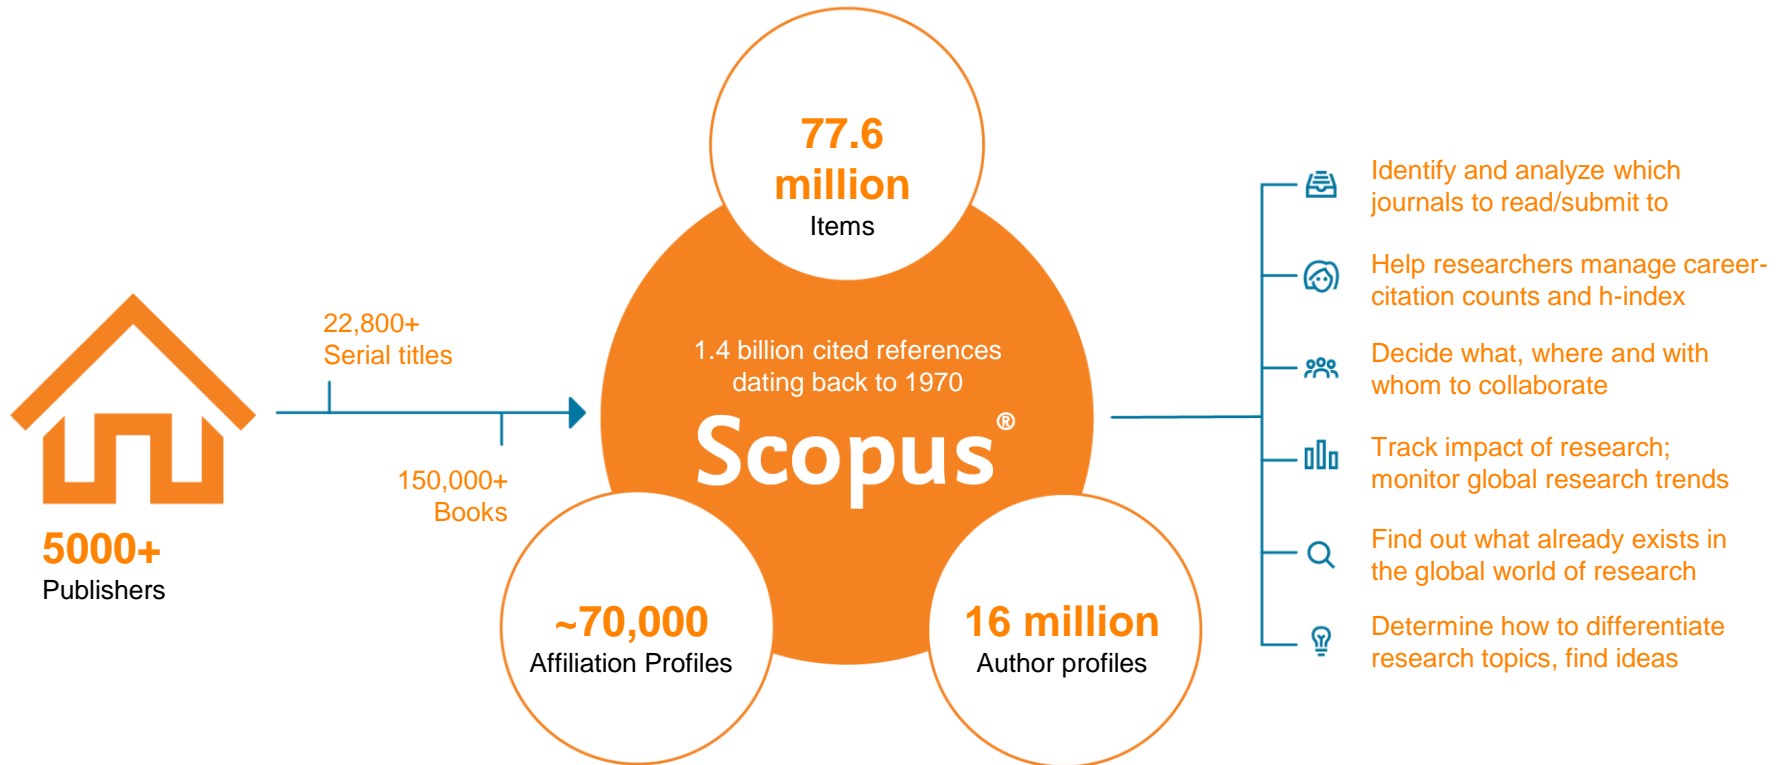

51%

50% in 2016  
56% in 2013

\* 'Articles downloaded' in 2013 and 2014

Base: 2016 n= 1691; 2014 n=2344; 2013 n=3001

**Scopus** is the largest abstract and citation database of peer-reviewed literature, and features smart tools that allow you to track, analyze and visualize scholarly research.

**Scopus** delivers a comprehensive view on the world of research. No packages, no add-ons. One all-inclusive subscription.

# The Bibliographic Indexing Leader

*Scopus is the largest abstract and citation database of peer-reviewed scholarly literature, making it a highly recommended resource for discovering the world of research*

## Expert curation

There are  
104,586\*  
active  
scholarly  
titles

Of which  
47,519\*  
are peer-  
reviewed

**Scopus**  
indexes  
24,600+

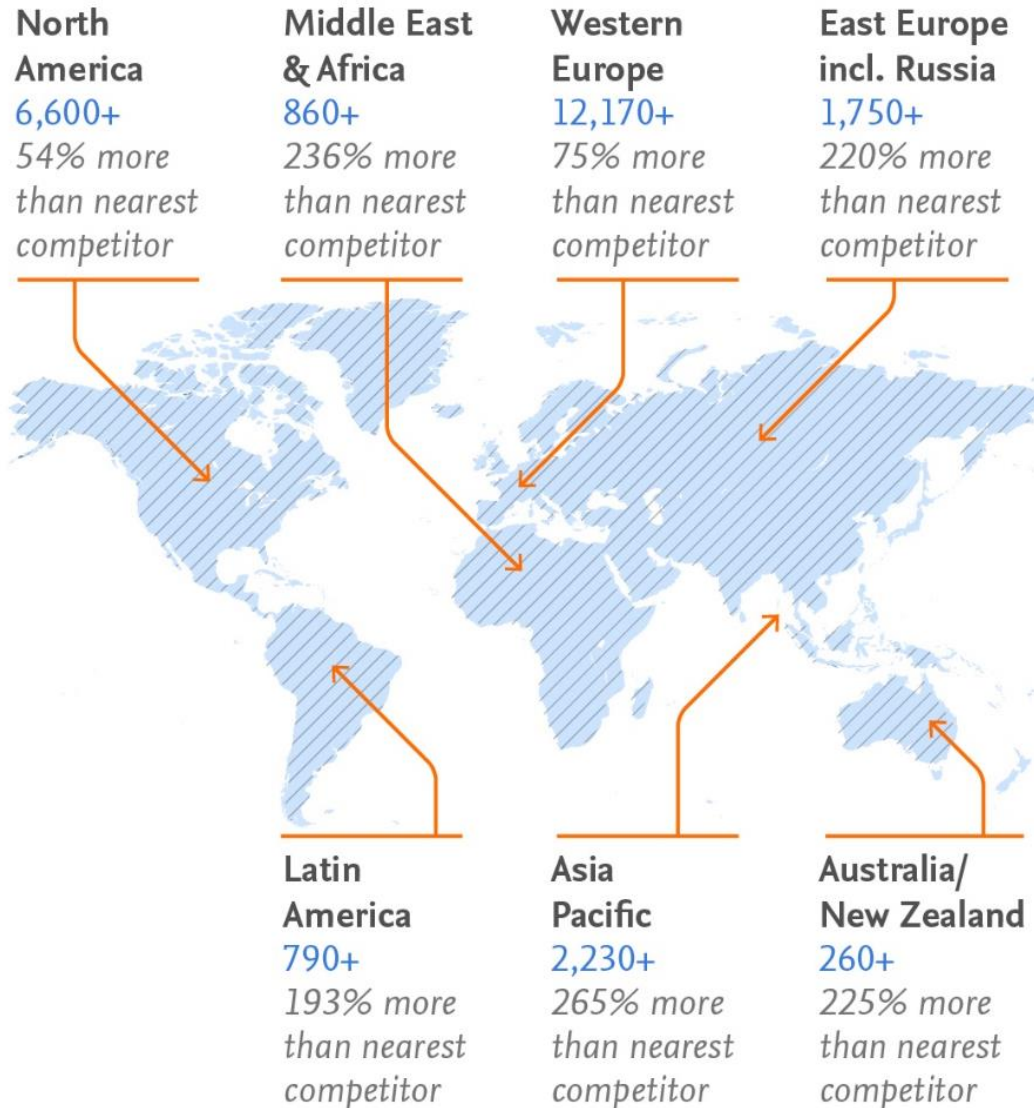

**Curated  
content**

- › Titles on Scopus are rigorously reviewed and selected by an independent board of subject matter experts to include 52% of the world's peer-reviewed scholarly literature.

\* Source: Ulrich's Web Global Serials Directory, February 15, 2019

# Global Representation means global discovery

Global Representation  
(number of active titles)

# What content is in Scopus?

# Global Representation means global discovery

## *Across all subjects and content types*

### Scopus includes content from more than 5,000 publishers and 105 countries

- 77.6M records from 24K serials, 119K+ conferences and 217K books
- 40 different languages covered
- Updated daily – approximately 10,000 articles indexed per day
- Multiple regional content types covered (journals, conferences, books, book series)
- 9.19M Open Access documents
- 5,527 active Gold Open Access Journals indexed

#### Number of Journals by subject area\*

	Journals	Conference	Books
Physical Sciences 7,441	24,039** Peer-reviewed journals	119K Conference events	852 Book series
Health Sciences 7,133	294 Trade journals	9.87M Conference papers	38K Volumes
Social Sciences 8,698	5,527 Active Gold Open Access journals	Mainly Engineering and Computer Sciences	1.5M Items
Life Sciences 4,601	>8,000 Articles in Press		217K Stand-alone books
	Full metadata, abstracts and cited references		1.78M Items
			Focus on Social Sciences and A&H

\*Journals may be classified in multiple subject areas: this count includes current actively indexed titles only

\*\*Total number of Scopus journals in database including inactive titles is 39,743

# Scopus

## The Bibliographic Index Leader

>**75M records** and over **23,500** active titles from more than **5K** international publishers. More than **3,759** Gold Open Access journals indexed, **165K** books and **8,3M** conference proceedings\*

Unbiased, comprehensive journal coverage with titles from **many reputable scholarly publishers:**

## Leading in Quality & Quantity

*Scopus continually processes, enriches and makes available a vast quantity of data, with rigorous quality-control standards to maintain the integrity of the database.*

### The Gold Standard

Scopus is recognized for its excellence by

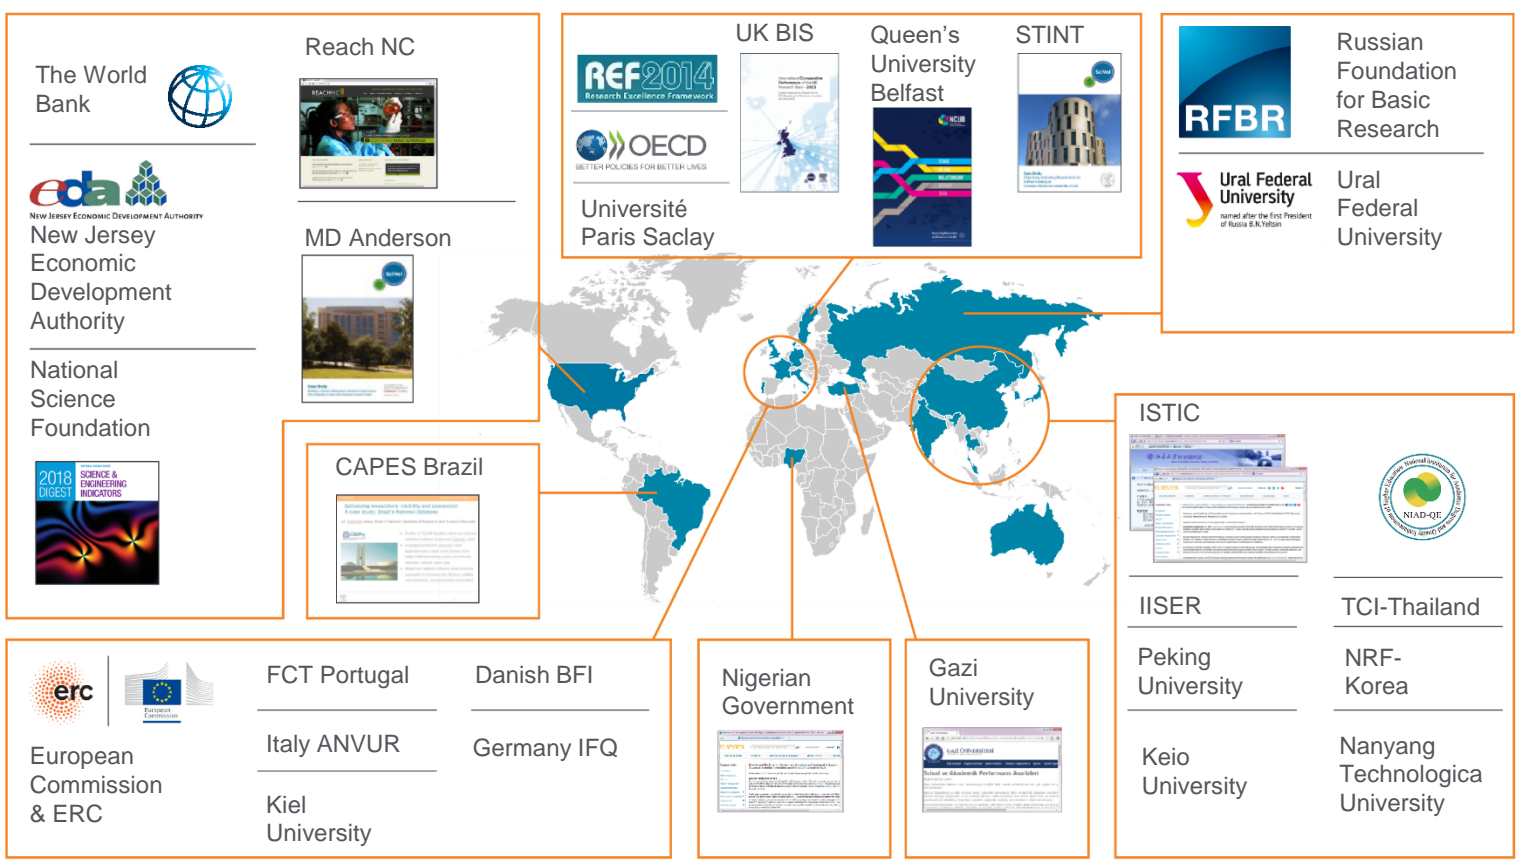

**5,000**

customers, including

**150**

leading research organizations who continue to choose Scopus for research assessment and evaluation purposes over any other competitor.

# Scopus is the Gold Standard: Evaluation, ranking, reporting, landscape analysis and other strategic efforts

## Rankings organizations

- 
- 
- 
- 
- 
- 
-

University Rankings use a combination of expert opinion (surveys) and objective data (including from Scopus)

# World university rankings – QS

**QS World University Rankings** – <http://www.topuniversities.com/university-rankings/world-university-rankings>

Published since 2004 by Quacquarelli Symonds

Formerly (until 2009) produced with Times Higher Education as *THE-QS World University Rankings*

## Academic reputation (40%)

From QS Global Academic Survey with almost 63,700 responses for 2014/15

## Employer reputation (10%)

From QS Global Employer Survey with 28,800 responses for 2014/15

## Citations per faculty (20%)

Citation counts from last five years considered  
Citation data source: Scopus  
Author self-citations excluded  
Normalised by staff FTE figures

Publication and citation data from Scopus is used

Scopus

## Faculty/student ratio (20%)

FTE values used for faculty and students

## International students (5%)

Proportion of students that are international

## International faculty (5%)

Proportion of faculty that are international

# World university rankings – THE

University Rankings use a combination of expert opinion (surveys) and objective data (including from Scopus)

**THE**

**THE World University Rankings** – <http://www.timeshighereducation.co.uk/world-university-rankings/>

Published since 2010 by the Times Higher Education

Broke away from the QS-partnered rankings prior to 2010 edition

## Teaching: the learning environment (30%)

Academic reputation survey: reputation for teaching (15%)

Staff to student ratio (4.5%)

Ratio of doctoral to bachelor's degrees awarded (2.25%)

(Field-weighted) number of doctorates awarded per staff FTE (6%)

Institutional income per staff FTE (2.25)

Publication and citation data from Scopus is used

## Research: volume, income and reputation (30%)

Academic reputation survey: reputation for research excellence (18%)

(Field-weighted) research income per staff FTE (6%)

(Field-weighted) research output per staff FTE (6%)

## Citations: research influence (30%)

(Field-weighted) citations in 2006-11 to papers published 2006-10

Scopus

## Industry income: innovation (2.5%)

Income from industry per staff FTE

## International outlook: staff, students and research (7.5%)

Ratio of international to domestic students (2.5%)

Ratio of international to domestic staff (2.5%)

(Field-weighted) proportion of research papers with international co-authors (2.5%)

# Transparent Scopus selection criteria for serial content

**All titles should meet all minimum criteria in order to be considered for Scopus review:**

Peer-review

English  
abstracts

Regular  
publication

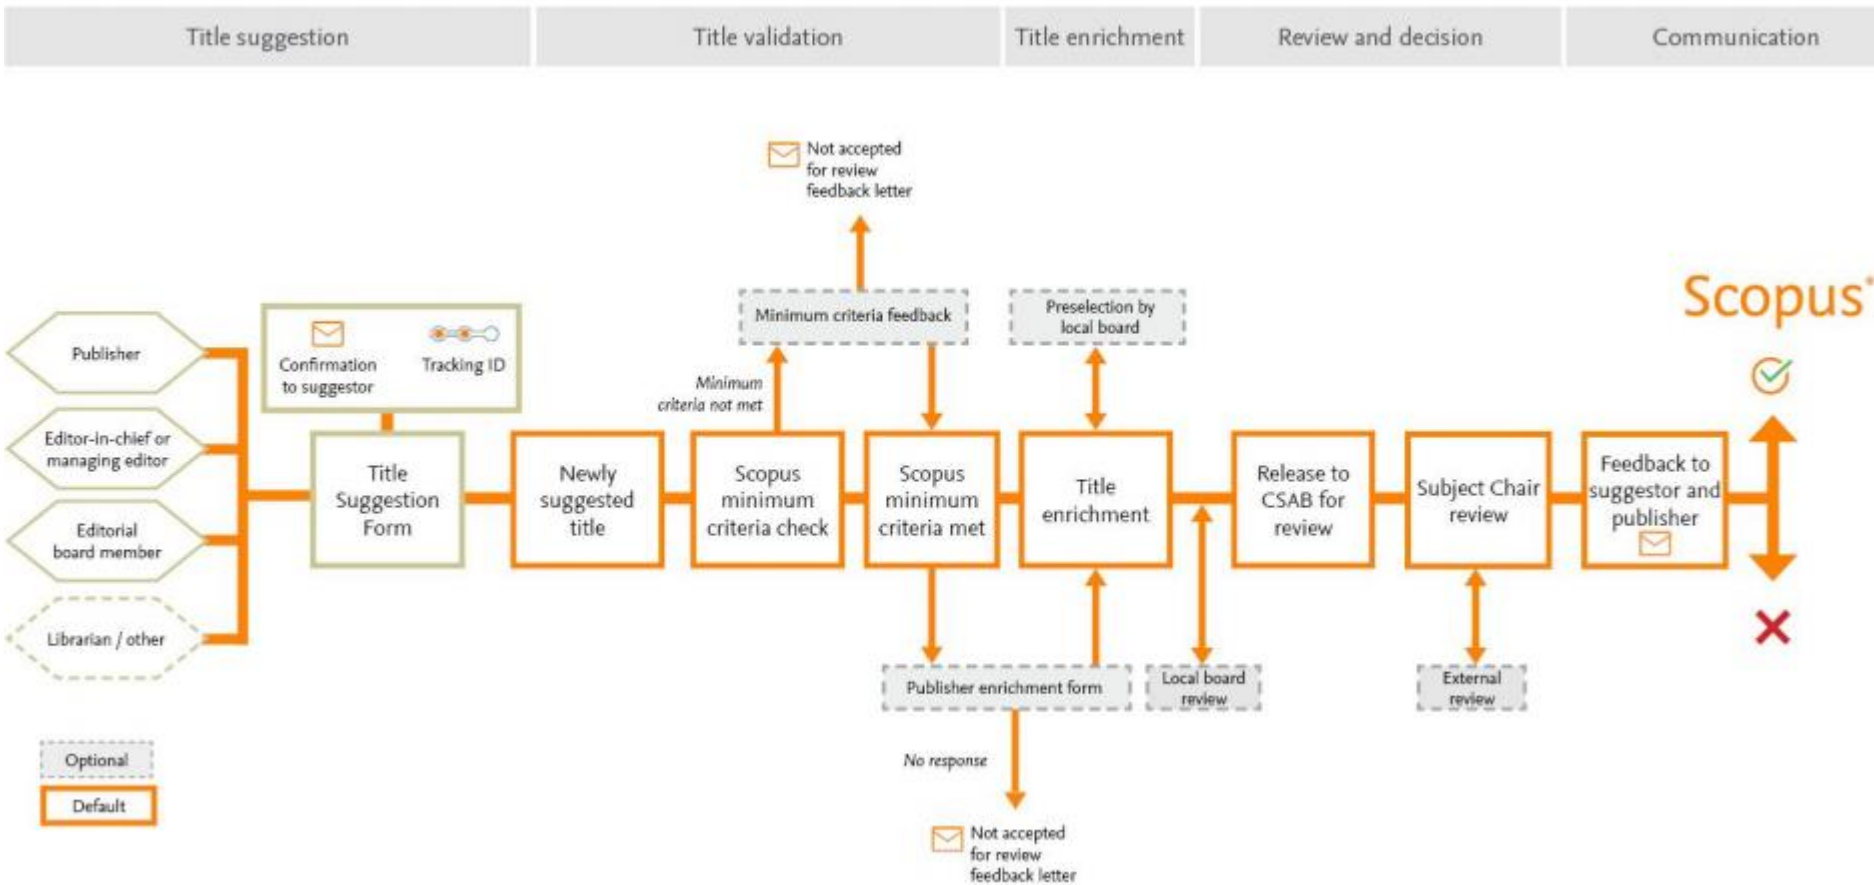

Roman script  
references

Pub. ethics  
statement

**Eligible titles are reviewed by the Content Selection & Advisory Board according to a combination of 14 quantitative and qualitative selection criteria:**

Journal Policy	Quality of Content	Journal Standing	Regularity	Online Availability
<ul style="list-style-type: none"> <li>• Convincing editorial concept/policy</li> <li>• Type of peer-review</li> <li>• Diversity geographic distribution of editors</li> <li>• Diversity geographic distribution of authors</li> </ul>	<ul style="list-style-type: none"> <li>• Academic contribution to the field</li> <li>• Clarity of abstracts</li> <li>• Quality and conformity with stated aims &amp; scope</li> <li>• Readability of articles</li> </ul>	<ul style="list-style-type: none"> <li>• Citedness of journal articles in Scopus</li> <li>• Editor standing</li> </ul>	<ul style="list-style-type: none"> <li>• No delay in publication schedule</li> </ul>	<ul style="list-style-type: none"> <li>• Content available online</li> <li>• English-language journal home page</li> <li>• Quality of home page</li> </ul>

# Continuous, online title review process for selecting new journals for Scopus coverage

## Objective, High-quality Resources

All titles on **Scopus** are selected by the independent Content Selection & Advisory Board, which is strict about quality and publishing ethics. Furthermore, we are transparent about our selection policy, criteria and title evaluation process: <https://www.elsevier.com/solutions/scopus/content/content-policy-and-selection>

Get to know

## Scopus

Scopus delivers a comprehensive view on the world of research.

No packages, no add-ons.

One all-inclusive subscription.

## Content Selection & Advisory Board (CSAB)

All journals covered by Scopus are approved by an independent Content Selection & Advisory Board (CSAB). CSAB members are subject experts from all over the world and chosen for their expertise in specific subject areas. Many have (journal) editor experience.

# Search Functionality

- **Choosing Search Terms**

- Use specific search terms that are closely related to your research topic
- Include alternative words and abbreviations
- Avoid words that are too general

- **Use Boolean Operators**

- **AND**

- Finds documents that contain ALL of the terms
- Use this when the terms must appear and may be far apart from each other
- Example: “Programmable Logic Controller AND Elevator”

- **OR**

- Finds documents that contain any of the terms
- Use OR when at least one of the terms must appear (such as synonyms, alternate spellings, or abbreviations)
- Example: micromouse OR picomouse

- **AND NOT**

- Excludes documents that include the specified term from the search
- Use AND NOT to exclude specific terms. This connector must be used at the end of a search.
- Example: micromouse OR picomouse AND NOT rodent

# Search Functionality

- **Finding Variations of a Word**

- To search for an exact phrase, including any stop words, spaces and punctuation, enclose the phrase in braces or inverted commas: {air con} or “air con”
- Special characters are included in the search
- Wildcards are searched as characters

- **Finding Phrases**

- Use wildcard characters to search for variations of a word
- Question mark (?) replaces a single character anywhere in a word. Use 1 question mark for each character you want to replace
- Asterisk (\*) replaces multiple characters anywhere in a word; it can be used to replace 0 and more characters.

## Exercise

- **SARS Coronavirus 2 (SARS-CoV-2)**
  - 526 Document Results – Search for “Novel Coronavirus”
  - 566 Document Results – Search for “Novel Coronavirus”, add search field, use the OR Boolean modifier, and include “COVID-19” or “2019-NCOV”
- **Remote Control Automated Fire Ignition System**
  - 2 Document Results – Search for “Fire Ignition System”, add search field, use the AND Boolean modifier, and include “Automat\*”
  - 113 Document Results – Search for “Ignition System”, add search field, use the AND Boolean modifier, and include “Automat\*”
- **Smart Controller for Air Conditioning System**
  - 2,121 Document Results – Search for “controller”, add search field, use the AND Boolean modifier, and include “air con\*”
  - 4 Document Results – Search for “smart controller”, add search field, use the AND Boolean modifier, and include “air con\*”

1	Synthesis and characterization of nanometric magnetite coated by oleic acid and the surfactant CTAB: Surfactant coated nanometric magnetite/maghemite	Celis, J.A., Olea Mejía, O.F., Cabral-Prieto, A., (...), Baggio Saitovitch, E.M., Alzamora Camarena, M.	2017	Hyperfine Interactions 238(1),43	0

Hide abstract ^ [Full Text](#) [View at Publisher](#) [Related documents](#)

© 2017, Springer International Publishing Switzerland. Nanometric magnetite (nm-Fe<sub>3</sub>O<sub>4</sub>) particles were prepared by the reverse co-precipitation synthesis method, obtaining particle sizes that ranged from 4 to 8.5 nm. In their synthesis, the concentration of iron salts of ferric nitrate, Fe(NO<sub>3</sub>)<sub>3</sub>·9H<sub>2</sub>O, and ferrous sulfate, FeSO<sub>4</sub>·7H<sub>2</sub>O, were varied relative to the chemical reaction volume and by using different surfactants such as oleic acid (OA) and hexadecyltrimethylammonium bromide (CTAB). The nm-Fe<sub>3</sub>O<sub>4</sub> particles were characterized by transmission electron microscopy (TEM), Mössbauer spectroscopy (MS), magnetic and X-ray diffraction (XRD) measurements. Typical asymmetrical and/or broad lines shapes appeared in all Mössbauer spectra of the as prepared samples suggesting strong magnetic inter-particle interactions, reducing these interactions to some extent by gentle mechanical grinding. For the smallest particles, maghemite instead of magnetite was the main preparation product as low temperature Mössbauer and magnetic measurements indicated. For the intermediate and largest particles a mixture of magnetite and maghemite phases were produced as the saturation magnetization values of MS ~ 60 emu/g indicated; these values were measured for most samples, independently of the coating surfactant concentration, and according to the ZFC-FC curves the blocking temperatures were 225K and 275K for the smallest and largest magnetite nanoparticles, respectively. The synthesis method was highly reproducible.

Abstract

GEANT4 is a toolkit for simulating the passage of particles through matter. It includes a complete range of functionality including tracking, geometry, physics models and hits. The physics processes offered cover a comprehensive range, including electromagnetic, hadronic and optical processes, a large set of long-lived particles, materials and elements, over a wide energy range starting, in some cases, from 250 eV and extending in others to the TeV energy range. It has been designed and constructed to expose the physics models utilised, to handle complex geometries, and to enable its easy adaptation for optimal use in different sets of applications. The toolkit is the result of a worldwide collaboration of physicists and software engineers. It has been created exploiting software engineering and object-oriented technology and implemented in the C++ programming language. It has been used in applications in particle physics, nuclear physics, accelerator design, space engineering and medical physics. © 2003 Elsevier Science B.V. All rights reserved.

Set Alert - Search Alert is saved search that you can schedule to run at regular (daily/ weekly/ bi-weekly/ monthly) intervals. Search Results will be sent to your mailbox

ORCID

## What is the Challenge? Scholarly Name Ambiguity

Many researchers that too closely resemble one another.

**Dr. Smith Dr. Smith Dr. Smith**

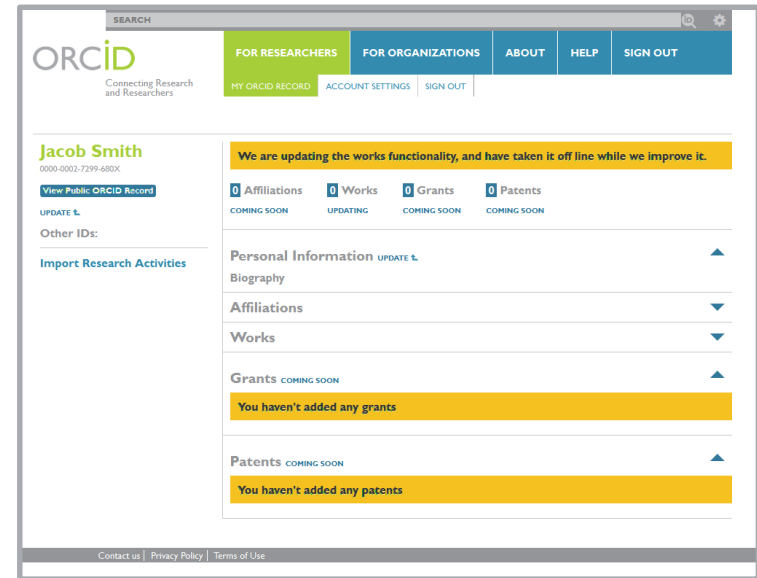

Researchers publish under name variations.

**Dr. Smith  
Dr. J. Smith  
Dr. James Smith**

## What is the solution? ORCID!

ORCID, the Original Researcher Contributor ID, provides a **persistent digital identifier** that distinguishes you from every other researcher and, through integration in key research workflows such as manuscript and grant submission, supports automated linkages between you and your professional activities ensuring that your work is recognized.

**Dr. Smith**  
**Dr. J. Smith**  
**Dr. James Smith**

HELP

## DISTINGUISH YOURSELF IN THREE EASY STEPS

ORCID provides a persistent digital identifier that distinguishes you from every other researcher and, through integration in key research workflows such as manuscript and grant submission, supports automated linkages between you and your professional activities ensuring that your work is recognized. [Find out more.](#)

1

**REGISTER** Get your unique ORCID identifier [Register now!](#)  
Registration takes 30 seconds.

2

**ADD YOUR  
INFO** Enhance your ORCID record with your  
professional information and link to your other  
identifiers (such as Scopus or ResearcherID or  
LinkedIn).

3

**USE YOUR  
ORCID ID** Include your ORCID identifier on your Webpage,  
when you submit publications, apply for grants, and  
in any research workflow to ensure you get credit  
for your work.

# PlumX Metrics

# PLUMX

## Metrics Categories

### USAGE

(clicks, downloads, views,  
library holdings, video plays)

### CAPTURES

(bookmarks, code forks, favorites,  
readers, watchers)

### MENTIONS

(blog posts, comments, reviews,  
Wikipedia links)

### SOCIAL MEDIA

(+1s, likes, shares, tweets)

### CITATIONS

(citation indexes, patent  
citations, clinical citations)

# Plum Print

The five categories of metrics are displayed for quick and easy understanding in a data visualization known as the Plum Print. When you rollover the Plum Print, more detail for each of the categories is visible. You can also click on it to get to all the detail for the metrics.

- The Plum Print is dynamic, each circle in the Plum Print represents the metrics in the associated category by color.
- The larger the circle, the more metrics in that category.
- There is a variety of ways to represent the Plum Print on article pages or in result lists.
- Designed to communicate engagement without a score

### Universiti Tun Hussein Onn Malaysia

## Author and Affiliation Wizard

- Including both Author and Affiliation Profiles, Scopus delivers a comprehensive view on the World of Research.
- Scopus includes 16M Author Profiles and 70,000 Affiliation Profiles\*.
- Scopus is the only database that implements algorithmic and systematic author disambiguation with high accuracy to create and maintain the most precise and complete profiles in the industry.
- Authors can themselves make changes using the Author Feedback Wizard.

## Author profile generation

The **Scopus Author Identifier** uses the most powerful **algorithmic data processing** in the industry to group papers to an individual's profile with a high degree of accuracy based on matching of name, email, affiliation, subject area, citations, co-authors, etc.

The **Author Feedback Wizard** is available for Author Profile changes to be requested due to the complexities of disambiguation, such as common names, name changes, incomplete metadata from publishers, etc.

# Source Browser & Journal Analyser

## Research Metrics

- Research metrics give a balanced, multi-dimensional view for assessing the value of published research.
- Based on the depth and breadth of its content, Scopus works with researchers, publishers, bibliometricians, librarians, institutional leaders and others in academia to offer an evolving basket of metrics that complement more qualitative insights.
- Throughout Scopus, you can access multiple metrics at the journal, article and author levels.

# Research metrics reference

Metrics illuminate the impact of your research outputs. Promotion and tenure committees, funders, advisors, research team leaders and potential collaborators are all interested in information about impact.

### But where to start?

Your library can advise you on metrics that can help you to:

#### Decide where to publish

- CiteScore
- SJR: SCImago Journal Rank
- SNIP: Source Normalized Impact per Paper
- Journal Impact Factor

#### Add to online profile

- *h*-index
- Percentile benchmark
- Usage
- Captures
- Mentions
- Social media

#### Enrich promotion & tenure portfolio

- *h*-index
- Percentile benchmark
- Usage
- Captures
- Mentions
- Social media
- Citations

#### Apply/report to funders<sup>1</sup>

- Percentile benchmark
- Journal metrics (e.g., CiteScore)
- Usage
- Captures
- Mentions
- Social media
- Citations

#### Benchmark a collection of research outputs *(for team leaders)*

- Percentile benchmark
- Field-Weighted Citation Impact
- *h*-index (if in the same field)
- Field-Weighted Download Impact<sup>2</sup>

# Journal Metrics in Scopus: CiteScore, SNIP and SJR

## CiteScore

- A metric that gives a more comprehensive, transparent and current view of a journal's impact.
- A 3 year citation window
- CiteScore's numerator and denominator both include all document types. This includes articles, reviews, letters, notes, editorials, conference papers and other documents indexed by Scopus are included. The numerator and the denominator used in the CiteScore calculation are thus consistent.

Universiteit Leiden

## SNIP

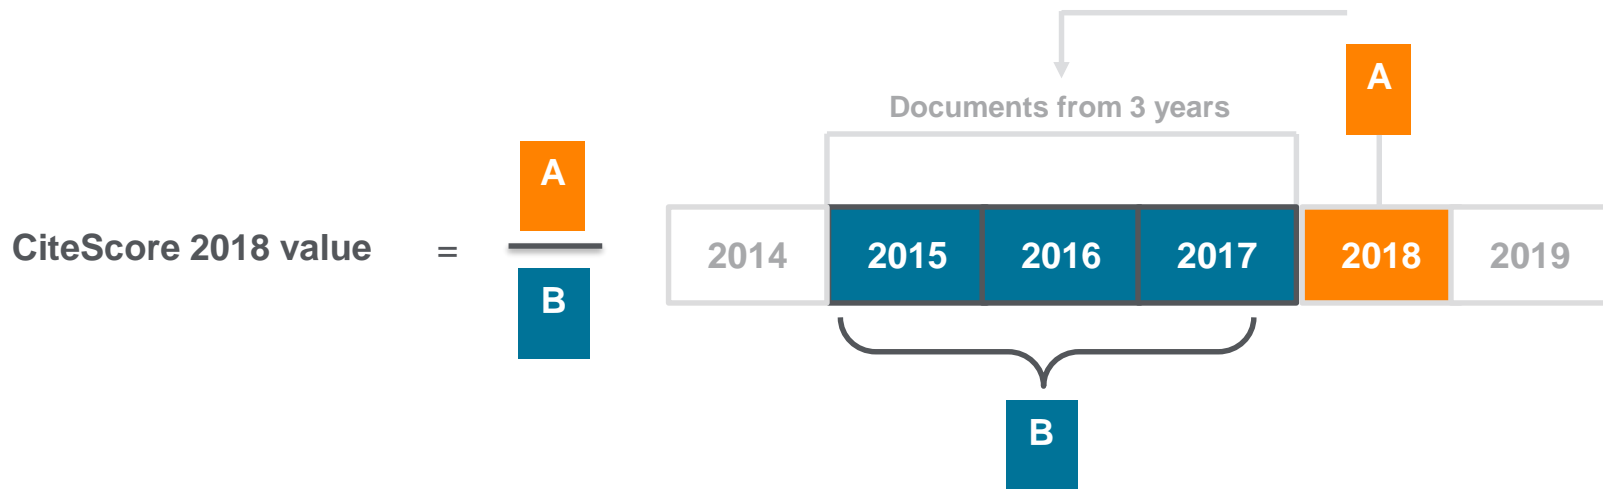

- SNIP = Sourced Normalized Impact per Paper
- Refined metric calculation, **better corrects for field differences**
- Outlier scores are closer to average
- Readily understandable scoring scale with an average of 1 for easy comparison

## SJR

- SJR = SCImago Journal Rank
- More prestigious nature of citations that come from within the same, or a closely related field
- **Overcome the tendency for prestige scores the quantity of journals increases**
- Readily understandable scoring scale with an average of 1 for easy comparison

# CiteScore is a simple metric for all Scopus journals

## CiteScore

A = citations to 3 years of documents

B = all documents indexed in Scopus, same as A

## Impact Factor

A = citations to 2 or 5 years of documents

B = only citable items (articles and reviews), different from A

## Scopus Author Identifier

The Scopus Author Identifier assigns a unique number to groups of documents written by the same author via an algorithm that matches authorship based on a certain criteria. If a document cannot be confidently matched with an author identifier, it is grouped separately. In this case, you may see more than one entry for the same author.

## Elsevier Researcher Academy

Elsevier Researcher Academy is an online platform which takes you through the different phases of the research cycle – from the beginnings of research preparation, through the publishing process, all the way to demonstrating impact..

- Prepares PhDs and Postdocs for their careers – either inside or outside of academia
- Helps researchers attain funding for their research
- Facilitates more researchers' papers being accepted in top journals
- A completely free service, providing support throughout the entire research cycle

## Discover how Malaysia is becoming a destination for research excellence

Supported by a strong national investment in research, Malaysia is embarking on a path to become a knowledge-based economy. As this report shows, the nation has been highly productive in terms of its number of highly cited publications per spend on research & development.

In fact, Malaysia's publication share is at least **twice** the global average in areas such as Business, Computer Science, Energy, and Finance, with high citation impact in Medicine, Physics & Astronomy, and Veterinary Science. This is accompanied by overall growth in research output and impact, showing Malaysia's increasing presence in the global research landscape..

Key findings in the report show:

- **Growing investment in R&D:** Malaysia's gross expenditure on research and development was \$12 billion USD in 2018, with an increase of 50% since 2014.
- **Increasing presence in the QS World University Rankings:** the number of Malaysian institutions in the rankings rose from six in the 2016 rankings to 20 in the 2020 rankings.
- **Malaysia as an attractive knowledge and research destination** for international faculty and students, and especially for highly prolific and impactful researchers that come from English-speaking countries on a short-term basis.

PlumX Metrics now on Scopus: Discover how others interact with your research

Submitted by Susanna Leamy on Wed, 07/26/2017 - 23:12

PlumX Metrics – with five categories of metrics – is now the primary source of article-level metrics on Scopus alongside the Scopus citation count (along with percentile benchmarking) and Field-weighted citation impact.

How to get to the Article Metrics module on Scopus:  
You can find the Article Metrics module on a Scopus Document details page, where a sidebar highlights the corresponding article-level metrics. Clicking on "View all metrics" opens a more detailed Metrics page, displaying all available metrics and
